English Enhancement Programme

Completed an academic English program in Malaysia covering all four language skills.

EXPERIENCE

AMAZING TECHNOLOGY AND SOLUTION COMPANY LIMITED Jan 2025 – Apr 2025

Position: Frontend Developer Intern

Project: Business website for advertising signage and lightbox design & installation | Team Size: 3

- Engineered real-time data synchronization utilizing WebSockets for instant content updates without page reloads.
- Developed a dynamic CMS implementing QuillJS for seamless rich text editing of news and services.
- Architected centralized state management using Redux Toolkit and Axios interceptors for optimized API requests.
- Designed a responsive UI leveraging Ant Design and Material-UI for an engaging cross-device experience.
- Implemented SEO optimization utilizing React Helmet to enhance platform visibility and search engine indexing.

PROJECT

Lowca – HCM Digitalized Street Food Application | Overview | Web Repo | Mobile Repo Jan 2026 – May 2026

Frontend Developer (Web & Mobile) | Team Size: 5

Technologies: ReactJS, React Native, Expo, Vite, Tailwind CSS, Redux Toolkit, SignalR, Recharts, OAuth, Openmap

- Developed core mobile app UI screens following Figma designs using React Native and Expo.
- Built multi-role dashboards (Admin, Vendor, Moderator) with RBAC, feature-specific permissions, and strict vendor verification workflows.
- Developed admin portal with detailed analytic dashboard, system configuration, and resource management.
- Implemented vendor portal with menu configuration, branches management, campaign/voucher management, and analytic dashboard.
- Created secure auth flows with JWT, Google/Facebook OAuth, and phone-based OTP verification.
- Built real-time order notifications and analytics dashboards using SignalR and Recharts.

Kādo – Trading Card Game Collector Platform | Overview | Web Repo | Mobile Repo Sep 2025 – Nov 2025

Frontend Developer (Mobile & Web) | Team Size: 3

Technologies: ReactJS, Vite, Tailwind CSS, Recharts, React Native, Expo, NativeWind, Expo Camera, WebSocket

- Built cross-platform mobile app with React Native & Expo covering collection management, deck builder, and community feed.
- Implemented Card Scanner using Expo Camera for automated card identification and collection entry.
- Developed Marketplace with product browsing, and personal listings features.
- Built web admin dashboard with comprehensive modules for Market, Posts, Users, Cashout, Transactions, and Revenue analytics.

Smoking Cessation Support Platform |  Backend Repo |  Frontend Repo

Jun 2025 – Jul 2025

Full-Stack Developer | Team Size: 5

Technologies: ReactJS, Vite, Tailwind CSS, Redux Toolkit, Chart.js, Node.js, Express.js, MongoDB, Node-cron, Nodemailer, VNPay, Socket.io

- Developed Quit Plan Generator with system algorithm to auto-generate personalized plans based on user goals and timeline.
- Built Progress Tracking & Analytics Dashboard visualizing smoke-free days, money saved, and health improvements via Chart.js.
- Engineered automated Periodic Notification System utilizing Node-cron and Nodemailer for real-time and scheduled motivational messages.
- Architected RESTful APIs with Express.js, designed MongoDB/Mongoose schemas, and integrated VNPay for secure payment processing.
